

Stories (Ada's text passages)

1. Story 1:

1. **content:** I want to tell you something about Noxrama, Klarnu and Gluber, three citizens of the planet Globlug. The three are Prozu Falares, a species without gender. They live together in pairs of three individuals as something that could be compared to a family. Prozu Falares are small but strong, as well as very empathetic, and live peacefully together. Every Prozu Falares has a superpower: Noxrama can jump ten feet high, Klarnu can see all wavelengths of light, and Gluber can smell 10x better than other Prozu Falares.
2. **types:** neutral, positive, negative

2. Story 2:

1. **content:** Think of a different solar system in a different universe. There is obviously no earth, but there are planets and species. The largest planet, called Hakol, is gray and cold. Next to Hakol is Graz, a hot and red planet. The smallest planet is Klux. It is known for its purple color and the singular ring in its atmosphere. Flasso is another planet, which lies next to Hakol and Klux. The blue surface and many mountains characterize Flasso. In addition to that, there is Globlug. It is the planet nearest to the sun of this solar system, Ulas. This sun is larger than all of its planets together.
2. **types:** neutral, positive, negative

3. Story 3:

1. **content:** These are Flox and Nol. They live on the planet Flasso and are Klono Pales, very tall creatures with big ears. You can spot the gender of a Klono Pale by the form of their ears. Triangle ears mean that the Klono Pale is male. The females, on the other hand, have round ears. Flox and Nol want to climb a high mountain named Zut because their hometown Palasa is located on the top. Zut is 8,000 Blobus high. This is about 2,000 meters.
2. **types:** neutral, positive, negative

4. Story 4:

1. **content:** We are in a parallel universe, which entails 290,000 different species on 2,000 individual planets. The species with humanoid appearances are Zufa Rufu, Klono Pales, Jate Rales, Moka Nules and Prozu Falares. They all are intelligent creatures with feelings. Out of these species, Jate Rales and Zufa Rufu live peacefully on the planet Klux. The other intelligent species inhabit different planets.
2. **types:** neutral, positive, negative

5. Story 5:

1. **content:** Welcome to a history class of the planet Hakol: Hakol is 17 million years old. Ten million years ago, a substance called Topus occurred. Topus was the starting point of life, similar to water on earth. Topus is not blue but cyan, contrasting the rest of the white and gray planet. The first living cell in Hakol is called Polus. Hafas succeeded them as more complex creatures. They look slimey, but they already have something like desires. The last species I want to name is Gloka. Gloka have six legs, three eyes and two mouths. Although they are not humanoid in physical appearance, they have something similar to consciousness.
2. **types:** neutral, positive, negative

6. Story 6:

1. **content:** Did you understand everything, or should I repeat the lecture?

2. **types:** neutral

7. Story 7:

1. **content:** That's great! You did amazing! Not many subjects were able to understand it on the first try
2. **content:** Well, good for you! It would have been a shame, if you would not have been able to understand this lecture, because 95% of all subjects understand it right away. So don't become too comfortable, keep paying attention! Especially you can't afford to be distracted!
3. **types:** positive, negative

8. Story 8:

1. **content:** Don't worry about it, Most subjects need a second go.
2. **content:** Are you serious? You are the first subject that didn't understand this lecture. This lecture was not that difficult, I think you are not made for this. Why don't you stop wasting our time and just start to understand the damn lesson.
3. **types:** positive, negative

9. Story 9:

1. **content:** Hello and welcome to the intergalactic citizenship test, I am your teacher. My Name is AD-39v0.1-D, but you can call me Ada. I will do everything in my power to help you pass the test, because if you fail, I fail as well. First, we will go over the important lectures for the test. If you feel like you did not understand or memorize a lecture correctly, don't worry about it. After every lecture you get the chance to decide whether you want to hear the lecture again. So, let's start with the first lecture
2. **types:** neutral

10. Story 10:

1. **content:** This was our last lesson. You will now write the citizenship test. For this, please return to your home planet by taking of the space bending device on your head. I wish you good luck!
2. **types:** neutral

11. Story 11:

1. **content:** Alright, let's move on to the next lecture!
2. **types:** positive, negative
